Abstract

This study examined the impact of reflective practice consultations on staff in a nonprofit provider of youth mental health services in Calgary, Canada. Three groups of participants completed surveys and qualitative interviews: frontline staff (n = 10) and supervisors (n = 14) who participated in reflective practice consultations, and a control group of supervisors with no additional support (n = 10). Survey results indicated that supervisors who took part in the reflective practice consultations showed quantitative improvements in resilience and reflective practice self-efficacy. Qualitative interviews indicated that establishing trust and safety facilitated use of reflective practice while feeling overworked impeded use of reflective practice.

Dr David Lindenbach – Research Director at Hull Services, UCalgary
Adjunct Associate Prof., Psychiatry

w/ Navroop Ghangas, Volunteer Research Student, Nursing

Goal

- Newly published, exciting paper
- Want to expand its reach and make the results more accessible to a general audience

Audience

- Convey findings to Hull's front line staff and managers

Medium

- Paper handouts for service points, workrooms, bulletin boards
- More likely to reach busy personnel providing service to Hull clients
- Headings & graphic elements to grab attention; keep it to less than a minute to read it.

ELEMENTS FROM THE PAPER

Participant Quotes

Learning to be vulnerable

- “It gives you that space to not have to be an expert, to not have to have all the answers”
- “It’s just that space of being vulnerable. That we’re as vulnerable as our clients. It’s okay to have those feeling of unsureness”

Learning from others

- “That’s one of the things that was really helpful: learning how other people were talking about things they are working through.”

Increasing collaborative supervision

- “In reflective supervision, trying to help people come to ideas and do some of the problem solving themselves”

Key Quantitative Finding

One reflective practice consultation per month increased:

- Reflective practice skills by 19%
- Resilience by 11%

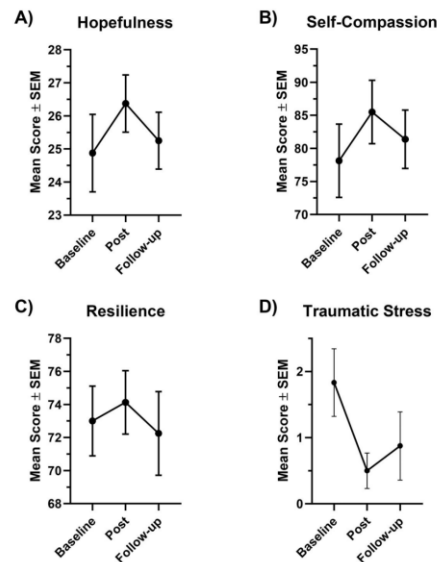

Figure 2. Change over time in mental health and wellness of front-line staff ($n=8$) after five sessions of reflective practice over 5 weeks. Post surveys were sent at 5 weeks and follow-up surveys were sent at 12 weeks. A) Trait Hope Scale. B) Self-compassion Scale. C) Health Resiliency Stress Questionnaire Parts A and B. D) Health Resiliency Stress Questionnaire Parts A and B. D) Health Resiliency Stress Questionnaire Part C.

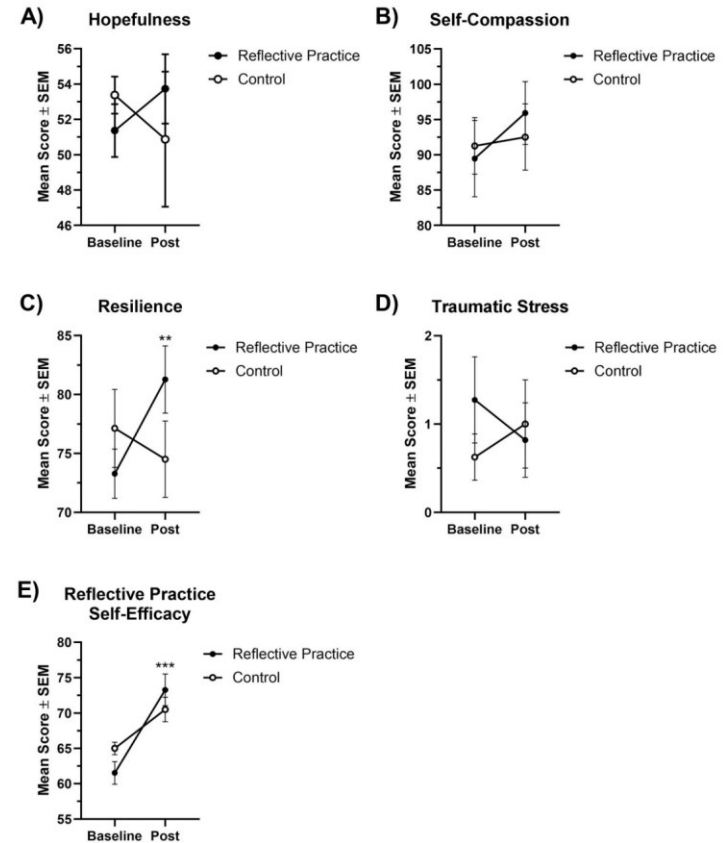

Figure 3. Change over time in mental health and wellness of supervisors after eight sessions of reflective practice consultation over 8 months ($n=11$ Reflective Practice; $n=8$ Control). A) Trait Hope Scale. B) Self-compassion Scale. C) Health Resiliency Stress Questionnaire Parts A and B. D) Health Resiliency Stress Questionnaire Part C. E) Reflective Supervision Rating Scale. ** $p < .01$ versus Baseline (Reflective Practice). *** $p < .001$ versus Baseline (Reflective Practice).

WHAT PIECES DOES THIS INFOGRAPHIC NEED?

Introduction

- What is reflective practice?
- Research – who did the research, the research took place at Hull Services

Findings

- What was found in the study
 - Reflection practice helps staff maintain resilience
- Quotes to convey the qualitative nature of the study and show the insights

Take Aways

- What insights from the research could be useful to staff's practices
- See the study!

Change in Supervisor Resilience

DEFINE REFLECTIVE PRACTICE

A structured process that helps professionals reflect on their experiences to gain insights, improve skills, and support personal and professional growth.

Key Finding	Evidence
Improved Resilience	Reflective practice boosted emotional resilience
Enhanced Peer Support	Shared reflection strengthened coworker bonds
Safe Spaces for reflection	Participants felt supported in tackling workplace challenges.

Supervision
Use reflection for support and growth.

Family Engagement
Apply reflection to enhance communication

Team Meetings
Begin with reflection to foster collaboration

Why study was conducted?

To examine reflective practice's impact on well-being, competency, and workplace interactions.

How was study conducted?

The study used surveys and interviews to assess reflective practice, involving frontline staff, supported supervisors, and a control group.

Change After 5 Months of Monthly Reflective Practice

	Front Line Staff	Supervisors without Reflective Practice	Supervisors with Reflective Practice
Resilience Health Resilience Stress Questionnaire Part A&B	Increase	Decrease	Increase*
Hope Trait Hope Scale	Increase	Decrease	Increase
Self-Compassion Self-compassion Scale	Increase	Increase	Increase
Traumatic Stress Health Resilience Stress Questionnaire Part C	Decrease	Increase	Decrease

* A 11% increase in resilience for the supervisors was measured to be statistically significant; the other trends did not meet this criteria.

"Learning how other people were talking about things they are working through was really helpful"

"It gives you that space to not have to be an expert... it's okay to have feelings of unsureness"

"In reflective supervision, we help people come to ideas and do some of the problem-solving themselves"

ACTIVITY 1: IDENTIFY IMPORTANT POINTS

1 Pick one of your recent projects.

What do you think are 2-3 useful things to know about your project for:

- General public
- Practitioners
- Peer Academics?

For each of these audiences, what minimum amount of information is needed to:

- Engage interest
- Trust this message
- Have sufficient background?

2 Share your answer with your table mates about the audience that you think you want to focus on.

3 What medium do you think works best for your message and audience?

Social media

Printed - What size?

Online (interactive)

Within larger document?

Video

ACTIVITY 2: PIECES TO WORK WITH

1. What are your key elements that you think are important?
 - Write them down on sticky notes.
2. Try to include at least two of each type of general component

Visual

[colour, typography, graphic]

Content

[facts, data, statistics]

Knowledge

[insight/perspective]

3. Other elements to think about: colour palette, logos, fonts, tables, animations, videos.
4. Iterate. Try changing text to a picture or matching a picture to your text.

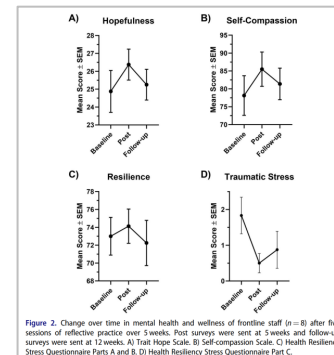

Figure 2. Change over time in mental health and wellness of frontline staff (n = 8) after five sessions of reflective practice over 5 weeks. Post surveys were sent at 5 weeks and follow-up surveys were sent at 12 weeks. A) Trait Hope Scale. B) Self-compassion Scale. C) Health Resiliency Stress Questionnaire Parts A and B. D) Health Resiliency Stress Questionnaire Part C.

Change After 5 Months of Monthly Reflective Practice			
	Front Line Staff	Supervisors without Reflective Practice	Supervisors with Reflective Practice
Resilience Health Resilience Stress Questionnaire Part A&B	Increase	Decrease	Increase*
Hope Trait Hope Scale	Increase	Decrease	Increase
Self-Compassion Self-compassion Scale	Increase	Increase	Increase
Traumatic Stress Health Resilience Stress Questionnaire Part C	Decrease	Increase	Decrease

* A 11% increase in resilience for the supervisors was measured to be statistically significant; the other trends did not meet this criteria.

Canva

WALKTHROUGH

CANVA

- Free, web-based graphic design tool.
- Designed for projects like: posters, infographics, social media posts, small videos, presentations, etc.
- Note, many similar freemium web-based tools exist as alternatives: Venngage, Piktochart, Infogram, Easel.ly, Visme.

Pros

- Many templates
- Drag & drop
- Multiple output formats
- Colour palettes and templates
- Large selection of graphics, stickers, fonts, etc.

Cons

- Unable to resize templates
- Limited design freedom once you've picked a theme
- Some elements not available with free account
- Limited options to import from other software

INTELLECTUAL PROPERTY & PRIVACY

You have all the rights to your creation. However, if you've used third-party content such as licensed content from the Canva library in your design, your ownership is subject to those third-party rights.

Allow your general usage to improve AI

We're always improving Canva by reviewing your general usage and the feedback you give us, but when it comes to AI, we want you to have the choice to opt-out.

When set to on, Canva and our trusted third-party partners will train AI using information about your general usage which includes fonts, colors, search queries and instructions you input. This does NOT include any of your uploaded images, videos, or designs.

Allow your content to improve AI

Your content is yours and we want to develop better AI features to help improve the way you create it in Canva. We have strict controls and policies in place to protect your content when building AI, but we still won't use it without your consent.

When set to on, Canva and our trusted third-party partners will improve AI using your content, which includes the text in your designs and your uploads (such as photos, videos, audio, and files).
